Stow

Wireless Optical Notebook Mouse

"Stow", the new wireless optical mouse from DICOTA, makes it much easier to work on the move! The USB receiver utilises 27 mHz technology with a 1.5 metre working range. The key feature: a simple click onto the underside of the mouse allows it to be stowed away when on the move. This reduces the risk of losing or forgetting the receiver! Furthermore the mouse power is switched off when the receiver is stowed at the bottom. This also has the effect of saving the batteries.

It has an 800 dpi optical sensor. Five buttons and the scroll wheel make it easy to use. The Plug & Play function makes Stow instantly ready to use. The attractive design and handy size makes Stow an ideal companion for your day-to-day business or personal life.
